Profile

WordPress Developer with over 3 years of commercial experience, as well as hands-on experience with other CMS platforms (PrestaShop, OpenCart). Strong knowledge of **HTML, CSS, JavaScript, and PHP**, with experience in developing and customizing themes and plugins, integrating third-party services, and optimizing performance and SEO. Worked on both personal and commercial projects. Master's student at **Rzeszów University of Technology** (part-time). Quick learner, effective team player, and well-organized in managing work tasks. Seeking a WordPress Developer position to further grow professionally and contribute to building high-quality web solutions.

Experience

Web Developer 01.2025 - Present
Aberit Software House Rzeszów, Poland

Responsible for developing, maintaining, and administering **websites and online stores based on WordPress and PrestaShop** for internal company needs and external clients. Configure e-commerce functionality, including payment systems, shipping methods, and management of products, orders, and users. Develop, implement, and maintain **custom modules and plugins**, including solutions based on **REST API** for integration with external services and internal systems. Optimize website performance and loading speed, ensure **responsive design (RWD)**, and improve **UX/UI**. Participate in the development of new features, bug fixing, updates, and ongoing support of existing solutions, as well as in the preparation of technical documentation. Independently responsible for interface design and closely collaborate with project managers during the planning and implementation stages, using modern **version control and task management tools**.

Software Developer 11.2021 - 08.2024
New Generation! Kyiv, Ukraine

Developed software for robots by designing control algorithms and automation processes. Performed testing in both simulation environments and real-world conditions, optimizing performance and task execution accuracy. In parallel, contributed to the **development and maintenance of websites and internal web services**, ensuring stability, responsiveness, and usability. Participated in the integration of new features, working in a team using modern project management and version control tools. Created technical documentation to facilitate maintenance and scalability of solutions. Successfully implemented automation algorithms that improved overall system efficiency.
